

~ Photographing Holiday Lights ~

Tuesday, November 1

6:00 p.m. to 7:30 p.m.

Why is it that when you photograph holiday lights they look like tiny dots of light you can barely see? Jeff Montanye will show us how to get brighter, more colorful, dynamic shots with an ordinary digital camera. You'll learn about mixing flash with holiday lights using slow sync photography & about bluelight-hour photography, the best time to photograph outdoor lights.
